LinkedIn: /elspeth-meakin/ | **GitHub:** /Moobell1212 | **Portfolio:** moobell1212.github.io

Front-end web developer with a certificate from Trilogy's skills bootcamp in front-end web development (https://skillsforlife.edx.org/) with a background in science content producing. Strengths in multitasking multiple projects at different stages, quick learner, teamwork, and detail-oriented.

Core Technical skills

JavaScript ES6+, CSS3, HTML5, Bootstrap, Git, GitHub, SASS, JQuery, Express, Node.js, React.

Projects

React weather forecast | Github: github.com/Moobell1212/weather-forecast| Deployed site: moobell1212.github.io/weather-forecast/
- Summary: React weather website that provides current and future weather forecasts in cities with the ability to compare cities.
- Role: Sole author.
- Tools: React, jQuery, JavaScript,HTML, CSS, API, and Bootstrap.

Frontenders | Github: github.com/Moobell1212/weather-forecast| Deployed site: moobell1212.github.io/weather-forecast/
- Summary: Group project to create a website which uses WordPress servers to create an 'agency' website using API calls.
- Role: Contributor (1/3).
- Tools: React, Node.js, HTML, CSS, JavaScript, API, and Bootstrap.

README generator | Github: https://github.com/Moobell1212/README-generator
- Summary: A README generator which uses Node.js and npm packages (e.g. inquirer) to generate a README file based on user inputs. This was a bootcamp challenge.
- Role: Sole author.
- Tools: Node.js, HTML, and JavaScript.

Experience

Front-end web development bootcamp   **2022 - 2023**
Trilogy's Skills Bootcamp in Front-End Web Development (16 weeks) - https://skillsforlife.edx.org/
- 11 hours per week, with 13 challenges & 2 group projects assignments. Sample challenges:
  - 5 day weather forecast (Github repository) - current and forecast weather website
  - README generator (Github repository) - Node run README generator created by the user in the integrated terminal
  - Work day scheduler (Github repository) - Work day scheduler utilising local storage written using JavaScript

- Constant work with Git and Github & all code editing done using Visual Studio Code

This course taught me the use of:
- React
- Node.js
- API's
- JSON & AJAX
- JavaScript
- HTML
- Test-driven development & Behavior-driven development
- Bootstrap
- Git
- GitHub
- JQuery
- Redux
- Expres

Past Work Experience

Content Producer (Biomedical and Life Sciences)   2018 - 2021
Henry Stewart Talks, UK - https://hstalks.com/biosci/

Production of online series, lectures, and interviews for the Biomedical and Life Science collection, including commissioning and recording. Management of around 200 lectures at a time whilst ensuring a steady release of lectures across all series through the year.
Key responsibilities:
- Being the point of contact for speakers, editors, and various teams in the company.
- Quality assessment of series, lectures, and interviews on the website.

Key achievements:
- Raising the audio quality for talks and interviews by identifying common issues and how to solve them by working with various teams in the company.
- Streamlining the production processes, involving various teams in the company.
- Training other producers.

Customer Assistant   2016 - 2018
Sainsbury's, UK

Working in a team to keep the fresh produce department stocked and clean while answering customer enquiries and providing assistance when needed.

Education

Front-end web development certificate - Trilogy's Skills Bootcamp in Front-End Web   **2022 - 2023**
Development (16 weeks) - https://skillsforlife.edx.org/

Natural Sciences MSci (2:1) - Biology and Physics - University of Nottingham, UK   **2013 - 2017**
- Mathematics in the first year

Other relevant information

- Travelling from November 2021 to March 2022
- Recovering from a concussion from March 2022 to October 2022
